BRATTON corporation

ESTABLISH DEALER SINCE 1907

***Celebrating 102
years serving the
needs of education!***

In 1907 our founder A.A. Bratton opened our doors in Columbus, Ohio as a business dictating machine dealer representing Thomas Edison.

In 1926 we installed the worlds first foreign language laboratory using the Ediphone, wax cylinder recorder to create an acoustic audio language lab.

Post World War II, The Magnetic Recording Institute designed and manufactured the first line of equipment specifically designed for foreign language education. Bratton Corporation was MRI's first dealer.

In the 1950's we installed the world's first high school language lab at University High School in Columbus, Ohio.

In 1972 Sony Corporation brought their line of language laboratory equipment to America. We signed on to represent Sony and are their oldest dealer.

From acoustic audio language labs to “state of the art” totally digital systems we have made it our business to provide

our clients with the best technology available.

Design, Installation, Training and Service, four items that set us apart.
