

Your Virtual Language Lab

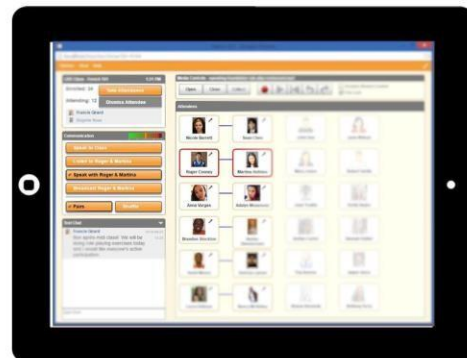

SANSSpace™ LIVE is a “Live Interactive Virtual Environment” designed for language learning.

Language teachers now have the flexibility to hold anytime-anywhere interactive language lab sessions with their students.

Language students gain more opportunity to develop communication skills, work on speaking and listening practice, individually or in pairs, all in a teacher guided setting.

Your language lab is now in any classroom or anywhere, any day or every day.

1:1 and BYOD schools have a powerful teaching tool to maximize individual and group language learning like never before.

- . Modern and intuitive teacher and student interfaces
- . Communicate with all students, individual students, or pairs working together
- . Pair students for listening and speaking practice (Teacher Selected or Shuffle)
- . Select and send media files to students
- . Live monitoring and oversight of student activity
- . Control student recorders to pace and guide activities
- . Text chat for instructor direction and class collaboration
- . Easily collect student work for review and assessment anytime, anywhere
- . Integrates with SANSSpace for flipped learning
- . Lesson content sharing, tracking, and student reports
- . More to come.....
